

PEOPLE ANALYTICS CHALLENGE

Solving NovaCorp's People Crisis

An Accenture AI & Data × SUBAA Experience // University of Sydney

01

Introducing Accenture

Our Purpose

To deliver on the promise of technology and human ingenuity

Who We Are

Accenture is a **leading solutions and services company** that helps the world's leading enterprises reinvent by building their digital core and unleashing the power of AI to create value at speed across the enterprise, bringing together the talent of our approximately ~784,000 people, our **proprietary assets and platforms, and deep ecosystem relationships**.

Our Strategy

To be the reinvention partner of choice for our clients and to be the most client-focused, AI-enabled, great place to work for reinventors in the world.

Reinvention Services

We bring together our capabilities across **strategy, consulting, technology, operations, Song and Industry X** with our **deep industry expertise** to create and deliver **solutions and services** for our clients.

Accenture at a Glance

Financial Results

US\$69.7B

FY25 Full-Year Revenues

US\$ 10.9B

FY25 Full-Year Free Cash Flow

US\$18.7B

FY26 First-Quarter Revenues

Approx. ~784,000

People as of Nov. 30, 2025

Clients

- + **9,000+** clients
- + Partnered with **195** of top **200** clients for **10** or more years
- + **129** quarterly client bookings **>\$100M** in **FY25**
- + 305 Diamond clients as of Nov. 30, 2025

Sustainability

- + Met our **2025** science-based target
- + **100%** renewable electricity across our offices
- + Recognized on the CDP Climate Change A List for **9** years and the Supplier Engagement Assessment for **8** years

Global Recognition

- + No. **4** on Great Place To Work® World's Best Workplaces™
- + Chair and CEO Julie Sweet ranked No. **11** on Fortune Most Powerful People in Business

Insight-driven

Turns noise into clarity

Clear communicator

Makes complex simple

Adaptable

Pivots when data surprises

Collaborative

Works across functions

Meet NovaCorp.

THE COMPANY STORY

NovaCorp is a 12,000-person Australian financial services firm losing an estimated \$42M per year to preventable attrition, disengagement, and hiring inefficiency. HR leaders have data — but no insight. The signals are there: high performers leaving, engagement scores declining, hiring costs rising. But the data sits fragmented across systems, and no one has yet connected the dots to understand what is really driving the problem.

The CHRO needs answers. Your team has been brought in to find them.

This is your challenge: choose the HR problem you believe matters most, dig into the data, and form a hypothesis about what is driving it. Then test your thinking against the evidence. What does the data show? Does it support your hypothesis — or does it point somewhere unexpected? From there, your job is to move from insight to action. Identify a solution that addresses the root cause, not just the symptom. Build a business case. Then pitch it — clearly, confidently, and backed by evidence — to NovaCorp's leadership team. The organisation does not need another report. It needs your team to choose a problem, back a solution, and make the case for change.

KEY CHALLENGES:

- Employees are raising concerns, but the full picture is unclear
- Leadership suspects there are barriers impacting workforce effectiveness
- People data exists across multiple sources, but insights are fragmented
- Different stakeholders have different perspectives on the root causes

The Business Problem

THE PROBLEM STATEMENT

NovaCorp is losing an estimated \$42M per year to preventable attrition, disengagement, and hiring inefficiency. HR leaders have data — but no insight. Your job: change that.

YOUR DATASETS

employee_master.csv

The foundation dataset. Contains one row per employee with demographic details, tenure, role and level, grade band, and department. Use this to understand who works at NovaCorp.

attrition_log.csv

A record of every employee who has left NovaCorp. Includes the date of leaving, department, role, and reason codes (voluntary resignation, performance exit, redundancy, etc.). Helps identify where attrition is concentrated, whether it is voluntary or managed, and whether any patterns emerge by tenure, team, or grade.

engagement_survey.csv

Quarterly pulse survey results and NPS scores at the employee level. Captures how employees feel about their work, manager, team, and the organisation over time. Use this to track sentiment trends, identify disengaged pockets of the workforce, and test whether low engagement predicts attrition or underperformance.

performance_compensation.csv

Individual performance ratings, promotion history, and learning and development activity. Use this to understand who is high-performing, whether top talent is being developed and rewarded, and whether there is a relationship between performance outcomes and attrition or disengagement.

The Challenge

01

EXPLORE

Dig into all datasets. Find patterns that aren't obvious — who is leaving, when, and which teams are at highest risk. Let the data guide you, not your assumptions.

💡 *Great analysts ask 'why' at least 3 times before accepting an answer.*

02

ANALYSE

Build an evidence-based narrative. Use segmentation, correlation, or predictive modelling to identify the top 2-3 root causes. Quantify the business impact wherever possible.

💡 *A stat without context is just a number. Link every finding to a business outcome.*

03

ADVISE

Turn your analysis into a prioritised recommendation. What should NovaCorp's CHRO do first? Second? How will success be measured? Be specific, practical, and bold.

💡 *The best recommendation is one an executive can action by Monday morning.*

How to Present Back

Your 5-step framework for a winning pitch

01

HOOK

Open with a striking stat or finding.
Grab attention before the detail.

02

STORY

Problem → Evidence
→ Finding → So What?
Keep your narrative linear and clear.

03

METHOD

Briefly cover your tools and approach.
Confidence not jargon.
Show your work.

04

IMPACT

Quantify everything.
\$, % or headcount.
What happens if NovaCorp acts?

05

RECOMMEND

1-2 bold, specific, prioritised actions.
Tell them what to do by Monday.

Judges are playing NovaCorp's executive team. Speak to them like a real client — confident, concise, insight-first.

How You Present Your Insights

Choose the format that best communicates your findings — we care about clarity and impact, not the medium

★ One rule for all formats: your audience is an HR leader, not a data scientist. Make insights easy to understand and clearly actionable.

Dashboard

Live or static — show key metrics at a glance with clear signals for what needs attention.

e.g. Attrition by dept, flight risk heatmap, engagement score trend

App or tool

Interactive — let the CHRO explore the data themselves with filters, sliders, or Q&A.

e.g. "What-if" attrition model, flight risk explorer, chatbot over HR data

Presentation

Story-first — walk through your findings with a clear narrative, so/what/now-what structure.

e.g. Slide deck: "3 things we found, and what NovaCorp should do next"

Demo

Narrated walkthrough — bring your analysis to life with commentary and visual storytelling.

e.g. 3–5 min explainer, voiceover on a demo, animated insight summary

✓ No jargon or p-values in the final output

✓ Every insight links to a recommended action

✓ A non-technical exec can act on it in under 5 mins

★ The best submissions won't just show what the data says – they'll tell NovaCorp what should be done about it!

Presentation Day Schedule

12PM – 1PM

Lunch with the Mentors

Each of the 4 finalist teams gets a 15–30 min check-in with mentors for feedback before the final pitch.

1PM – 2:45PM

Working Session

Each team implements the mentor feedback and polishes their final presentation.

3PM – 5PM

Final Presentation + Winner Announced

10 min presentation + 5 min Q&A | Winner announced at the close.
